## **Report Distribution and Alert Escalation**

Link: https://help.responsiblefleet.com/docs/about-hierarchies/using-hierarchies-with-alerts/ Last Updated: February 11th, 2016

In addition to managing user access and vehicle groupings, hierarchies also help manage distribution of information across all of the divisions, branches, and separate business units operating under an organizational umbrella. Hierarchies allow you to easily schedule reports/alerts to automatically run for the appropriate vehicles and be delivered to the appropriate individuals, including automatic escalation of violation alerts.

In order to use hierarchies for report distribution and alert escalation, you must set up the appropriate hierarchy-based attributes.
