GPSI-4000HD

Link: https://help.responsiblefleet.com/installation-video/gpsi-4000hd/ Last Updated: January 8th, 2016

This video walks you through the following steps in the installation process:

- 1. Locate the vehicle's diagnostic port, and ensure proper voltage.
- 2. Install the external antenna, and route the cables.
- 3. Free up existing JPort, and install the HD Pass-Thru Cable.
- 4. Mount the replacement diagnostic port.
- 5. Connect the white wire to ignition, and tape off unused power harness wires.

Since the publication of this video, the installation process for this device has changed. Please review the **HD White Wire insert** before you install your device.

- INSTALL OPTIONAL ACCESSORIES -
- 6. Connect the antenna cables to the device.
- 7. Connect the HD Pass-Thru Cable to the device.
- 8. Verify installation, and tamper-proof remaining connections.
- 9. Mount the device.
