Driveri DriverID Field

Key Changes

A new field, "Driveri DriverID", has been added to the Master Admin interface when creating a driver from the Admin: Drivers page. This new field now serves as the unique 1-to-1 connection between GPS Fleet Tracking and Driveri platform.

Release Notes - Driveri Driver Sync Update

Link: <https://help.responsiblefleet.com/release-notes-driveri-driver-sync-update/> Last Updated: July 24th, 2024

Note. The previous RefID field is no longer used as the primary matching differentiator for driver syncing but is still available as a field when creating a driver.

Benefits

- **Improved Accuracy:** Eliminates errors caused by the previous 1-to-many relationship between GPS Fleet Tracking and Driveri Portals.
- **Enhanced Synchronization:** Ensures consistent driver identification across both platforms.
- **Simplified Management:** Streamlines the process of creating and managing driver accounts.
