Portal Updates

The following is a list of updates recently made to the GPS Fleet Tracking Portal:

- Added ability for users to download Drive360 camera clips from the Portal to their computer for long-term storage. Learn more at [About Drive360](#).

- Removed 'Today' as a timeframe option on Fleet Utilization reports.
- Driver Scorecard and Diagnostic reports now reference the user's timezone as the default when running reports.
- Battery Voltage is now shown on the [Vehicle Card](#) for vehicles equipped with [G09 devices](#).

Fixed Bugs

The following is a list of recently resolved bugs:

- Resolved an issue where Camera events were not displaying correctly.
